TO: US ENVIRONMENTAL PROTECTION AGENCY

Office of Enforcement and compliance assurance

Date: January 20th , 2015 .

M/T TOSKA- BIGSTONE PHILADELPHIA , USA JANUARY 2015

DESCRIPTIONS OF ACTIONS TO ACHIEVE COMPLIANCE

The vessel arrived at Bisglone Anchorage on 11/26/2014 at 07:40 am when the berthing schedule at that time was to take place before January 15 –as per agents' information.

On Dec 30th 2014, agent advised that it would not be any lighter barge alongside before late January

On Jan 05th the agent indicated the berthing would take place before end of February/End of March.

Due to anchor space unavailability the charterers arranged the ship to shift at Breakwater anchorage on Jan 7th 2015.

Since January 5th 2015 we have commenced investigation as with regards bunkering possibilities at Breakwater anchorage and we were advised by two agents on January 7th 2015 that Bunkering is permitted.

On Monday January 12th 2015 the approached Bunker Suppliers advised us that they do not perform deliveries at specific anchorage.

There is only one barge operator, who potentially delivers bunkers at Bigstone Anchorage.

On January 13th 2015 we have been advised by agent that the vessel could reach the berth by February 14th 2015

On the same day we have booked bunkers with Aegean Bunkering USA for delivery at Big Stone Anchorage. Delivery dates- January 14th-15th 2015.

Quantity 650 MT LSMGO max 0.1%

Bunker deliveries are performed only by one barge operator according to all sources of information. i.e. Vane Brothers Co.

We have requested from the Charterer to arrange for a space at Bigstone Anchorage and we have managed to shift on January 14th 2015.

Since then the vessel is awaiting for the Bunkers Suppliers to deliver compliant product.

We are continuously asking for Bunker delivery schedule; however Bunkers suppliers refrain from providing exact schedule, claiming bad weather, equipment availability or breaks between their port operation.

On January 19th we have been advised that the earliest Bunker Delivery Dates are between January 24 and 28 2015.

Our LSMGO reserves as of today January 20th is approx. 14 MT. considering the unpumpable fuel quantity onboard we estimate that we run out of ECA compliant fuel on January 22 2015

E-mail: operations@tms-tankers.com

We have adequate LSFO max. 1% LSFO approx. 664 MT for which we intend to consume immediately thereafter.

The ship is to perform three STS operations at Bigstone Anchorage followed by discharging operation at Philadelphia.

Our agents Norton Lily are continuously monitoring the situation on behalf of the owners.

We are doing our outmost to find solution and ensure compliance with prevalent ECA regulation

I certify under penalty of law that the statements and information made herein are, to the best of my knowledge and belief, true and complete.
